      2. EXDINR (Executive Dining Room System). [ ] contacted [ ] (Contractor, EDR POS) concerning the date that the Executive Dining Room (EDR) accounting staff will be running the bills. [ ] will be installing the procedures to run the bills on Monday, 9 May and the EDR accounting staff will run the bills on Tuesday, 10 May. [ ]

      4. ICS (Inventory Control System). Errors in the ICS offline data base, ICSBAT, were discovered when OIT/DBCC ran the monthly GIMSTATS of the data base. Since errors were also detected during March's month end processing of the offline data base, [ ] had OIT/AMB restore ICSBAT back to the end of February's month end. [ ] then proceeded to extract March and April's data from the online data base. Once the data was extracted, counts were done on the Activity, Commit, and Stockno records so that comparisons could be run once the data was loaded back onto ICSBAT. Working through the night, [ ] reloaded the data onto ICSBAT, ran comparison checks and counts between the offline and online data bases, and batched the GIMSTATS for ICSBAT to ensure that <u>errors still</u> did not exist. The GIMSTATS were error free. [ ] then had OIT/AMB run an FDR (fast dump-restore) to backup the data base. [ ]

B. <u>CLAS</u>:

1. Release 1.3 Commercial: The installation of
Commercial Release 1.3 began last Tuesday and has continued
through this week. Some problems have been encountered but
overall the install is progressing better than previous
deliveries. We are hoping that the Supply Team will have
access to the data base commencing 16 May. Confidence is
high at this point that IOC for Bill of Materials is on
schedule for 1 October.
